

Dear Colleagues,

I am pleased to inform you that the 12<sup>th</sup> International Workshop on Pseudo-Hermitian Hamiltonians in Quantum Physics (PHHQP12) will be organized at Koç University, Istanbul, 02-06 July, 2013.

Similarly to the previous meetings in this series, PHHQP12 aims at providing an opportunity for exchange of ideas among the experts working in various theoretical as well as experimental aspects of non-Hermitian operators. Among the topics to be covered in PHHQP12 are PT-symmetry and PT-optics, exceptional points and spectral singularities, indefinite-metric theories and Krein-space methods, open quantum systems, and resonances.

The website of PHHQP12 is located at [home.ku.edu.tr/~phhqp12](http://home.ku.edu.tr/~phhqp12).

If you are interested in attending PHHQP12 or wish your email address to be removed from this list, inform us by replying to this message.

Hoping to see you in Istanbul next July,

Sincerely,

Ali Mostafazadeh (on behalf of local organizers)
