## PUBLICATIONS:

\* Indicates student/mentee author. In cases where the first author was a student/mentee, **last author denotes that I was the senior author** mentoring a student/mentee working with me. If listed as senior author, that means I designed and oversaw the study, supervised and trained the student/mentee (either an undergraduate, or graduate student, or a postdoctoral trainee or junior faculty), and I was largely responsible for the finished paper. In only one case I am the last author, but not the senior author (since the first author was not a mentee; I noted this under that publication in bold letters).
